Vinotemp Wood Cabinets have insulation at 11.6 R factor,

Real wood interior racking with metal bracing hold bottles in individual cubicles and some stacking by the cooling unit may be provided.

A Magnetic seal 360 degrees is around each door.

We use Wine Mate cooling system which is efficient, and environmentally friendly with R134 refrigerant.

Please view terms & conditions on www.vinotemp.com for warranties.

Most units are oak exterior, economy models use Luan mahogany.

If your unit includes finish there are 3 coats of stain and 3 coats of gloss.

E series has only 4 choices of stains.

The free standing units need ventilation of 6 inches or more clearance at the rear of the unit and 12 inches on the sides and top for proper circulation of air.

Improper installation puts your wine at risk and will void your warranty.

Freight is collect.

Hard to find woods are also available.

You can pick up the unit from our factory. We can schedule delivery for you via van lines or trucking companies.

We can export and crate for export.

Not responsible for typographical errors.

Prices features and descriptions are subject to change without notice.

Due to wood textures and variance color might me different.
