- Upon first use, batteries must be inserted into device. Remove the battery cover to insert batteries. Observe the correct polarity on the battery compartment. Close the battery cover by turning it clockwise.
- When the capacity of the batteries is low, the battery status will display "Lo" on the LCD display. Follow the same steps as above to replace the batteries. Note: The blue backlight will remain on for 5 seconds. The LCD display remains on to show "Lo" status.

Operating Notes:

1. When the wine bottle with the unit on is tilted 45 degrees or more, the unit will stop for safety.
2. When the unit works for over 5 minutes and air storage cannot reach the preset value, the unit will stop working. The LCD will show "Err" to inform the user that there is something wrong with the sealing parts or any other malfunction which needs repairing.
3. Vacuum sealer may not turn on if battery is too low on power, sealer is not pressed down correctly onto bottle, or there is no liquid in the bottle.
4. Allow approximately 60 seconds for vacuum sealer to complete its pressurization of the wine bottle.

TEMPERATURE DISPLAY

- Press the °C/°F button to show the temperature within the wine bottle. The blue backlight comes on for easy reading of the temperature.
- Press and hold the °C/°F button to switch temperature display between Celsius and Fahrenheit.

REMOVING THE VACUUM SEALER

Press the pressure release button.

- The blue backlight comes on to indicate the unit is working to break the vacuum.

Any damages due to manufacture defects will be handled directly with Epicureanist, subject to the limited warranty.

All sales are final, and unless authorized in writing by the Seller, Purchaser may not return the goods, under any circumstance.
