

ASSEMBLY INSTRUCTIONS

VT-155SBW Display Rack

Vinotemp®

For the display rack to fit wine bottles, a shelf must be removed first.

**Display rack cannot be put on the top shelf or the shelf directly below the control panel. It must be put on a middle shelf to fit properly.*

Step 1: Remove the shelf directly above the shelf you want to put the display rack on. To remove shelf, be sure that each of the notches 1/3 of the way back on the wooden shelf are directly under the plastic posts, on the interior side walls of the cooler. Lift the shelf up vertically.

Step 2: Pull out the shelf where the display rack will be placed. Place the display rack on the wooden wine shelf.

Step 3: Align the front of the display rack with the front trim of the wine shelf. Make sure the display rack is securely on the wooden shelf.
