

DYNAMIC COOLING/SILENT MODES

The Dynamic Cooling feature enables the relative humidity inside the unit and the temperature to be distributed evenly around the interior so you can store all of your wine under the exact same excellent conditions. If you would like to use the unit to store wine long term, the dynamic cooling is a must. This will create a continuous climate in the cabinet which imitates that of a wine cellar.

In the Dynamic cooling mode, the interior fan circulates the inside air evenly until the set temperature is reached. Dynamic Cooling is the factory preset mode. To change to Silent mode, touch and hold the UP button for approximately five seconds. The wine cooler will beep three times to confirm silent mode is on. To change back to Dynamic Cooling mode, touch and hold the DOWN button for five seconds. The wine cooler will beep five times to confirm Dynamic Cooling mode is on.
