## 155-BOTTLE DUAL-ZONE TOUCH SCREEN WINE COOLER

### Stylish

Designed for the serious wine connoisseur, this stylish cooler features an insulated glass door with stainless brushed PVC trim, creating a beautiful display and making it easy to see and select which bottle to uncork next.

### Built-In

The 155-Bottle Dual-Zone Touch Screen Wine Cooler features front exhaust. You can safely recess this model into existing cabinetry for seamless installation.

### Dual-Zone

Two independent temperature zones allow you to store both red and white wines in this cooler. Both temperature zones have a range of 40-72°F. We recommend setting the temperature of the upper zone between 40-55°F and the lower zone between 55-72°F. The temperature for the lower zone should always be the same or higher than the upper zone. For optimal performance, the set temperature of the two zones should differ by at least 4 degrees.

### Digital Temperature and Light Control

Equipped with a fully digital control panel located on the front of the door, you can adjust the temperature or turn on the light without having to unlock the door and cause any unwanted temperature fluctuations.

ABOUT  
BOTTLE  
CAPACITY

### Elegant Wine Racking

Pull out black wire shelves with black wood lip offer a sturdy storage solution for your best bottles. There are 13 full size shelves and 2 half shelves.

### BOTTLE CAPACITY

This chart is provided as a general guide to bottle sizes. Everyone's collection is different and there are many different bottle sizes and shapes on the market. The bottle capacity listed for Vinotemp wine coolers is for standard Bordeaux 750ml bottles which are approximately 2.75" in diameter and 11.75" tall. Storing large and/or oddly shaped bottles (including Champagne and sparkling wine bottles) will decrease the number of bottles you are able to store in your wine cooler.
