

Wine-Mate 3500HZD Self-Contained Horizon Wine Cooling System

Key Features

- Digital temperature control to provide subtle cooling at 50~65 °F
- Oversized and bottom feeding evaporator for humidity maintenance
- Horizontal cold air discharge for best cooling in wider wine cabinets or rooms
- Multiple top and rear hot air exhaust
- High efficiency ball-bearing fans for both condenser and evaporator
- Extra insulation for both thermal and noise isolation
- Removable grill for easy cleaning
- Self-contained ready for use and easy to install

Specifications

| | |
|-----------------|--|
| Cabinet Size: | 650 cu ft |
| BTU/h, CFM: | 3500, 250 |
| Decibel Rating: | 58 dBA for cooling, 54 dBA for cabinet |
| Dimensions: | 14-1/4"W x 21-1/4"D x 19-3/4"H |
| Electrical: | 115V/60Hz/6A |
| Exhaust: | Rear (standard) or top |
| Weight: | 75 lbs |
| Thermostat: | Advanced Digital Control Display |

Features

HZD series cooling units are designed and used to provide a stable temperature between 50~65 °F for a properly insulated space. The refrigerated space will maintain humidity range within 50~75% RH. These temperature and humidity ranges are optimized for long term storage of wine. Temperature is controlled and humidity is adjusted using innovative technology. Horizontal cold-air supply is optimized for use in the wide cabinets or wine rooms. The unit is self-contained ready for easy installation and use and is perfect for storing cigars, chocolate, salami, and fine leather and furs (additional cost and customization required).
