

Key Features

- Floor-mounted wine cooling system
- Digital temperature control to provide subtle cooling at 50~65 °F
- Remote condensing unit with evaporator unit
- Evaporator unit has special coil coating
- Condensing unit can be located up 75 ft away from cellars to reduce noise
- Evaporator unit is ETL & NSF certified

Specifications

Cellar Size:	1500 cu ft
Btu/h, CFM:	6500 Btu/h, 630 CFM

Wine-Mate 6500SSAWC Split Floor- Mounted Wine Cooling System

Features

WINE~MATE floor-mounted split cooling systems WM-6500SSAWC are designed to provide a cold environment between 50~65 °F with a humidity range within 50~75% RH for a properly insulated wine cellar. These temperature and humidity ranges are optimized for long term storage of wine like that in natural caves. SSAWC evaporator are designed for mounting on the floor, making them an ideal choice for quick and convenient installation. The evaporator units have a special coil coating. SSAWC cooling systems consist of a remote condensing unit and an evaporator unit and they are connected by a liquid line and an insulated suction line. SSAWC condensing units can be located away from the wine cellars up to 75 ft so that noise and compressor vibration are isolated.
