

All you wine connoisseurs still dreaming of your own personal collection can wake up and get a whiff of what's new in the wine market. Vinotemp has combined the convenience of a wine dispenser with the storage capacity of a wine chiller. Presenting, the brand new Dual-Zone Wine Dispenser and Cooler, with its 88 wine bottle capacity. That's right! Now, 34 of your more expensive wine bottles can be placed on the upper zone and the other 54 in the lower zone. The dispensers will pour out chilled wine from four separate open bottles. This unit helps keep your precious wines fresh for several weeks thanks to the use of nitrogen gas. There are options for storing red and white wines at their optimal serving temperature.

The front exhaust permits free-standing or even built-in installations. A touch screen control panel helps you monitor the exact temperatures with ease. An interior LED blue light highlights the wine display with style and elegance. It has dual refillable gas systems and is ideal for home or commercial usage. The Dual-Zone Wine Dispenser and Cooler dimensions are 23.5" W x 24.5" D x 63.625" H. Priced at \$4,995, you can place an order at [Vinotemp](#).
