Description

Designed to take the design, functionality and visual appeal of wine storage to the next level, Vinotemp's newest collection of wine coolers, the Private Reserve Series, is the first to feature patent pending Backlit® interior lighting (each cooler is equipped with three different LED options – Heliotrope, Amber and Vinotemp BioBlu™) and patent pending stainless steel gliding wine racks that cradle bottles so the labels of the wine stored are front facing. The new series consists of three, front vented wine coolers (Private Reserve Series 188-Bottle Wine Cooler, Private Reserve Series 141-Bottle Wine Cooler, Private Reserve Series 41-Bottle Wine Cooler) that can be installed in both commercial and residential settings. Features of Vinotemp's Private Reserve Series include:

- Backlit® interior lighting.

Each cooler is equipped with three visually stunning LED options – Heliotrope, Amber and Vinotemp BioBlu™ – which can be custom selected at any given time.

- Innovative engineering.

A vibration-damping design better protects the coolers' contents and the coolers are engineered for both low energy consumption and low noise.

- Easy installation.

Front vented and designed for built-in or freestanding installation, the coolers make it simple for designers, restaurateurs, homeowners, etc. to add proper undercounter wine storage for up to 188 bottles.

- Customizable temperature control.

An adjustable 23-degree temperature range (41-64°F) allows users to select a proper, customized storage climate and serving temperature for light or dark wines.
