What's New

Composite decking delivers superior traction

DECKORATORS expands its line of wood-alternative decking with Voyage featuring Evolutions technology. Including a textured embossing for superior traction underfoot in both wet and dry conditions, the composite decking, like others in the company's Evolutions decking family, absorbs virtually no moisture and allows virtually no thermal expansion or contraction. A vertical grain variegation plus four colors—Sierra, Tundra, Costa and Mesa—provide the appearance of high-quality wood. Three lengths of 12-, 16- and 20-ft. solid and slotted-edge profiles and a 12-ft. fascia will be available. Circle 12 on inquiry card

Freedom from defined kitchen workspaces

POGGENPOHL aims to eliminate the boundary between kitchen and living with •Venovo by redefining the constructs of furniture and kitchen cabinetry. The collection's freestanding island, lowboard and highboards can be combined and moved, like furniture, from one room to another as well as from one home to another. Seemingly to float within a room but supported by two streamlined frames floating around the carcass, the kitchen furniture items can incorporate all functions and areas, such as exhaust ventilation, ovens, refrigerator, sink and worktop. Storage capacity, aesthetics on display in wine cooler

The VINOTEMP 187-Bottle Single-Zone Wine Cooler features six pull-out black metal wine racks with an acrylic lip—an industry first. Helping to reduce the growth of bacteria and mold, the Vinotemp BioBlu LED interior lighting is further captured and highlighted by the acrylic wine racking. Capable of storing more than 15 cases of wine, the cooler has an adjustable 27-degree temperature range for a customized storage climate and serving temperature. A bulk storage area can accommodate additional or oddly shaped bottles. Circle 14 on inquiry card

Look, feel of weathered planks with stone veneer

CREATIVE MINES evokes weathered barnwood and patinated fences with its line of Craft Weathered Planks masonry veneer. A celebration of the American countryside, the line includes five products to select or mix—Barnstave, Blueskye, Greenfield, Milkpaint and Redbar—that vary from vibrant and intense to more burnished and weathered tones and come in three sizes. The company's Mixology Program provides the opportunity to mix and match, blend and shape selected stone veneer blends and colors for highly customized looks. Circle 15 on inquiry card

Platform delivers corded or cordless power

METABO HPT, formerly Hitachi Power Tools, rolls out its MultiVolt platform in addition to its name change. Without sacrificing portability, power or performance, the platform delivers the choice of either cordless or corded operation. When running cordless, tools can accept a 36-volt battery which delivers 4.0 Ah of runtime in 36-volt MultiVolt tools and 8.0 Ah of runtime in 18-volt; plug into an outlet using an AC Adapter for corded operation. The platform eliminates the need for a corded and cordless version of the same tool. Circle 16 on inquiry card
