# BRAMA STAINLESS DISHWASHER

Vinotemp

Kitchen & Bath > Appliances > Dishwashers

Wine storage provider [Vinotemp](#)

has launched its new line of kitchen appliances, Brama by Vinotemp, with the collection's first product: the Brama Stainless Dishwasher.

The stainless-steel Brama is designed to accommodate and clean large loads of dishes, with enough room for 16 place settings across three dish racks. The racks may be adjusted to fit the user's needs. The unit is ENERGY STAR certified, and features a self-cleaning, multi-filter system that reduces the amount of water the appliance needs to run.

“We're excited to announce Brama appliances by Vinotemp with the launch of the Brama Stainless Dishwasher as it marks a new milestone for our company,” says India Hynes, CEO of Vinotemp. “As the name ‘Brama’ implies, the appliances are strong, and we've dedicated years of research to ensure their strength is balanced with sleek design. We're proud to unveil the Brama Stainless Dishwasher as the first product in the appliance line as its numerous features fully showcase its, along with the line's, dedication to performance.”

The Brama Stainless Dishwasher offers six washing options, six cycle selections, and a turbidity sensor. All options operate quietly, at a volume of 44 dB or below.
