MARY SALMONSEN

SHOW GUIDE → PRODUCTS

13 Neolith
The newest colors in Neolith's stoneware collections include New York-New York, a mix of mara and shine gray tones; Mar de Plata, which places blue-gray quartz banding on a light gray surface to create a ripple effect; More Blanc, a white slab with gray marble-style veining; and Sofia Capura, a dark surface with a metallic appearance. Neolith's stone is made from a composite of clays, feldspar, silica, and natural mineral oxides. Each one is fully recyclable, durable, and requires little maintenance. neolith.com 800NH3432

14 Panasonic
The Whisper Hood IAQ 28-inch under-cabinet range hood is designed to be installed inside a cabinet, expanding kitchen design options for builders and providing discreet ventilation through a flush, stainless-

steel filter. It delivers a maximum of 390 CFM of high-velocity quiet capture efficiency, with five power settings. The metallic grease filter is removable and dishwasher safe. panasonic.com 800NH3434

15 Ply Gem
The newly redesigned casements for Ply Gem's MIRA aluminum-clad wood windows offer an improved thermal design system, standard-sized hardware, and a thinner screen design. The new sash cladding gives the window a historic look, and works together with the overall thermal design to create a protective layer against cold air and heat intrusion. MIRA is available with 7/8-inch-thick glass as standard, with options for triple-pane insulated glass and four additional new glass options. plygem.com 800NH3438

16 Samsung
Samsung has reimaged its Chef Collection to offer a full suite of Wi-Fi enabled appliances, including the collection's new 36-inch dual-fuel Pro Range, available in stainless steel or matte black stainless steel. The built-in range features two independent burners that may be adjusted from 22,000 BTU to 850 BTU. The 6.3-cubic-foot oven can hold large or multiple dishes, and offers a push-to-start Steam Cook feature. samsung.com 800NH3478

17 Vinotemp
The Private Reserve Series 41-bottle wine cooler offers the features and design of the existing series in a smaller size for under-counter or freestanding installation. The cooler's stainless steel gliding wine racks are designed to keep wine

bottles' labels facing forward. Users can set the temperature between 41 and 63 degrees Fahrenheit, and display their wine collection with three LED backlighting options: heliotrope, amber and BioBlu. The cooler is front-vented and engineered for low energy consumption. vinotemp.com 800NH3300

18 Top Knobs
The Grace collection, developed to mark Top Knobs' 25th year in operation, is comprised of 276 hardware pieces in six series: Barrow, Henderson, Kent (pictured), Pomander, Minetta, and Riverside. Each one is inspired by the "ageless beauty" of New York City neighborhoods, with a "slipped down" modern touch. The collection will be unveiled in full at KBIS. topknobs.com 800NH2763
