Vinotemp

April 26, 2019

Vinotemp has announced the addition of the VinCave Wine Cellar 200 and the VinCave Wine Cellar 450 to its wine storage offering. The modular, underground wine cellar solutions are designed to leverage the cool temperatures found underground to properly – and efficiently – cellar up to 450 bottles of wine.

The minimalist, European-designed VinCave Wine Cellars are engineered to utilize the cooler, consistent temperatures found underground to properly store wine. This environmentally friendly design requires the cellars be installed on a flat floor surface at either ground or basement level.

The VinCave Wine Cellar 200 features a glass covering and a push-button elevation function that raises the wine collection above ground for easy access, while the VinCave Wine Cellar 450 features a sleek glass door that both covers and opens electrically to allow access to the cellar. Both versions feature a ventilation system and 100-percent stainless-steel chassis and frames.
