What's Hot in Dishwashers

1. **FORZA's** 24-in. built-in Tall Tub Dishwasher features 16 settings, six washing programs, low energy consumption and an extra power-washing setting for heavy soiled pots and pans. In a stainless-steel finish, the handle's dramatically sculpted lines are indicative of the company's radical Italian design, influenced by the history of Ferrari and Maserati.

9. The Brama Stainless Dishwasher by **VINOTEMP** is an Energy Star-certified dishwasher with a 16-place setting capacity. The dishwasher also boasts a flexible racking system to accommodate tall dishes, a quiet 44db operation, six cycle selections and a turbidity sensor to customize and enhance cleaning.

available in brass, satin-nickel and chrome finishes.

6. Now in two model options, with or without a water softener, **COVE** – the latest brand from Sub-Zero and Wolf – has a fully adjustable interior and a nearly silent cleaning cycle. Cove units are also connected-capable, allowing users to receive notifications when it's time to replenish items like dishwasher detergent and rinse aid.

7. The new **AEG ComfortLift** Dishwasher with QuickSelect controls is an upgrade from the 2016 version; both let the user gently slide and lift the lower basket up and down for easy loading and unloading. The upgraded dishwasher features AirDry Technology to improve drying performance, as well as a removable cutlery tray and a dedicated glass-washing program.

JENNAIR boasts an ultra-low volume with three-stage filtration, pressurized wash arms and alternating wash action in two wash zones. The dishwasher is Wi-Fi connected and includes remote start with custom wash styles and the ability to check cycle status. Immersive theater lighting gradually increases to full intensity, illuminating the dishwasher tub and minimizing shadows inside.

11. From **GAGGENAU**, the 400 Series back-wall illuminated dishwasher boasts Zeolite Drying technology to enable all dishware – including plastics – to be fully dried. Zeolite is a natural mineral that allows moisture to be transformed into heat up to 176 degrees Fahrenheit, subsequently distributing the warm air equally across dishes. Home Connect is also now available with this product.
