# Vinotemp Expands Brama Appliance Line With Two New Microwave Ovens

Over-the-range and built-in/countertop models now available

Vinotemp announced the addition of two microwave ovens to its appliance line, Brama by Vinotemp. Both the over-the-range option along with the built-in or counter-top option offer modern design aesthetic, navigable interfaces and a variety of cooking options including a smart, Sensor Cook function.

"The ability to offer a full suite of kitchen appliances coupled with the continued growth of the microwave cookware segment drove our decision to add microwave ovens to our line of Brama appliances," India Hynes, CEO of Vinotemp said in a statement. "And by offering both an over-the-range microwave and a built-in or countertop microwave, we're providing options when it comes to adding versatility and convenience to the kitchen."

The Brama Over the Range Microwave (1.6 cubic feet, 1000 watt) features surface (task) lighting along with a two-speed exhaust fan, while the Brama Built-In Microwave (2.2 cubic feet, 1200 watt) includes a memory function that saves the desired power level and time for up to three items that are most often heated/cooked.

Both models offer:

- Sensor Cook Function
- Multi-stage Cooking
- Ten Power Levels
