

VINOTEMP & Custom Builder Online

Cool Wine Storage

Vinotemp has unveiled a new model that combines wine storage and refrigerated drawers in one unit. Part of the brand's Connoisseur Series, it features 10 gliding metal/wood racks with enough storage space for approximately 108 standard-size wine bottles, and pull-out drawers with space for about 100 cans. The wine zone features a 31-degree temperature range to ensure optimal drinking temperatures for a variety of wines.
