#### 10 Wine Decanters Worthy of Your Wedding Registry

Brides published a list of their top ten wine decanters to add to a wedding registry and Vinotemp's Epicureanist Wine Chilling Decanter with Ice Cup was selected as the best for serving white wines. While it's mostly red wines that largely benefit from being decanted, most wine experts agree that white wines can be decanted, too—although they're usually ready for sipping much quicker than reds. For this family of wines, look to smaller decanters, like the slim Epicureanist model from Vinotemp. It even comes with a removable ice cup that can be inserted within the decanter's punt in case you prefer a chilled white wine come summer.
