A look at KBB's Product Award Submissions.

The EL-168ZZ-S Single-Zone Wine Cooler from Vinotemp features a seamed stainless-steel trim door with all-glass technology. This cooler has room to store up to 157 bottles on 12 full-size, zig-zag-style shelves with an innovative Prism acrylic lip to see your bottle labels from a distance. There is also a bulk storage section for odd-sized wine bottles. A digital temperature control panel is located at the top of the cooler that allows you to set and control the temperature of your wines. The interior Vinotemp BioBlu LED lighting helps reduce the growth of bacteria and mold, and the wine cabinet can be built in or freestanding.
