Often our wants exceed our space in our homes, but the holiday gift idea for the wine lover that I discovered will literally is the best space-saving way to store those simply fabulous bottles of vino. Lavishly live the holidays out loud and use this holiday gift idea for the wine lover on your list! Cheers to you for uncorking the most spectacular wine storage technology!

MIRRORED TRIM

Important to realize is that this wine cooler is very slim in profile. With this in mind, you can store and chill up to 7 bottles of wine.

Vinotemp's exclusive patent-pending mirrored trim keeps the contents inside hidden while looking lavish in any space it fits into. The mirrored wine cooler reflects well on all those who pass it by.

Surely, you see that the wine cooler includes dual-pane glass windows and a black cabinet and that it is just stunning. The color and design were perfect for my kitchen mix of Stainless Steel and black, it just pulled it all together, in my opinion.

My workable space is 6" wide. I am excited beyond words to have found a wine cooler that is both trendy and space saving! In spite of having so little space, the fit is perfect. Moreover, to run this for the year, it averages me about \$35 because it is Energy Efficient.
