FOR IMMEDIATE RELEASE

## NEW VINOTEMP 187-BOTTLE SINGLE-ZONE WINE COOLER FEATURES INDUSTRY-FIRST, PATENT PENDING ACRYLIC WINE RACKING

*Unique wine racking and a 15-case storage capacity make Vinotemp's newest cooler a wine collector must have.*

(October 2, 2018) – [Vinotemp®](#), the recognized leader in architectural wine storage solutions and cooling technology, today launched the [Vinotemp 187-Bottle Single-Zone Wine Cooler](#). Featuring industry-first, patent pending acrylic wine racking, Vinotemp BioBlu™ light-emitting diode (LED) interior lighting, and storage for over 15 cases of wine – the new cooler is a visually stunning wine storage must have for medium to large-sized wine collections.

“From storage capacity to technology and visual aesthetics, Vinotemp is committed to continuing to push the envelope in wine cooler design. And our newest cooler, the 187-Bottle Single-Zone Wine Cooler, is no exception,” states India Hynes, CEO of Vinotemp. “We’ve had a great response to recent innovations in interior lighting and wine racking, and our newest cooler pays homage to both by leveraging our most popular LED interior lighting option, and further accentuating it with the addition of acrylic.”

Featuring a seamless door with all-glass technology, security lock, Vinotemp BioBlu™ LED interior lighting (which helps reduce the growth of bacteria and mold), the newest addition to Vinotemp's unparalleled wine cooler offering also includes:

- **Patent Pending Wine Racking.**

The cooler is equipped with six pull-out black metal wine racks featuring a patent pending acrylic lip. The acrylic enhances the cooler's visual aesthetic by capturing and further highlighting the Vinotemp BioBlu™ LED interior lighting.

- **Bulk Storage.**

Designed to properly store large wine collections, each wine rack is designed to support numerous bottles/rows of wine. A bulk storage area at the bottom of the cooler accommodates additional and/or oddly shaped bottles.

- **Customizable temperature control.**

An adjustable 27-degree temperature range (41-68°F) allows users to select a proper, customized storage climate and serving temperature for light or dark wines.
