

ICERA

ICERA UNVEILS A NEW LINE OF CONSOLE LAVATORY SINKS DESIGNED TO COMPLEMENT THEIR POPULAR SUITES.

ICERA is proud to introduce four new console lavatory stands to their line of quality bathroom furnishings. As with all products in the extensive ICERA collection, each console lavatory is designed with the entire bathroom in mind to create a coordinated composition. The lavatory sets range in style from the Renaissance, embodying a decidedly classic form, to the Julian, designed to reflect a more modern or contemporary look. Although they make a distinctly elegant statement on their own, each console lavatory creates a cohesive look in the bath when paired with a coordinating toilet. These consoles add style to any bath space – a striking feature in a larger bathroom or the perfect centerpiece for a powder room or small bath.

The lavatory tops are impeccably crafted in vitreous china, feature MicroGlaze™ anti-microbial porcelain glaze and have 8" faucet centers. All four models are available in white, with select models available in balsa and black. The stainless steel stands are PVD-coated for corrosion resistance and available in polished chrome, polished nickel, satin nickel and polished brass finishes. Retail prices range from \$785 to \$1,500.

All ICERA vitreous china products are backed by an unprecedented limited lifetime warranty and are available at premium bath showrooms nationwide. For 20 years, the American-owned and -operated ICERA Group has been dedicated to the innovation and manufacture of premium bath fixtures. Specializing in high-performance water closets and the most technically challenging of ceramic products, ICERA surpasses industry standards and consumer expectations. With collections ranging from the contemporary to the classic, ICERA products combine uniqueness and elegance in design, best-in-class performance and lasting quality.

Vinotemp

VINOTEMP ANNOUNCES PLANS TO START WORK AT 100,000 SQ. FT. LOS ANGELES-BASED FACILITY

Move to make Vinotemp the largest wine cabinet and cooling unit designer in the United States

Vinotemp®, a recognized leader in the wine storage, technology and goods industry for 30 years, today announced it will move part of its company to a 100,000 sq. ft. facility beginning December 2017. The move will make Southern California-based Vinotemp the largest wine cabinet and cooling unit designer in the United States.

In addition to the extra space necessary to meet forthcoming design demands – and Vinotemp's

continued designing of its world-renowned wine cabinets, wine cellars, and wine cooling units.

"For over 30 years Vinotemp has been dedicated to providing consumers—along with the world's top restaurants and resorts—with the finest wine storage solutions that are proudly designed and assembled in America," states India Hynes, Vinotemp CEO. "Vinotemp's dedication to quality and to designing in the United States is what ultimately led to this move. We're excited about the opportunity because it allows us to expand our capabilities domestically all while positioning Vinotemp as the largest designer of wine cabinet and cooling units."

Vinotemp is scheduled to begin work at the new Los Angeles-based location in early December; the company's corporate headquarters will remain at the current Irvine, California location.
